

## Introduction

Xcell Misting Limited is an innovative Fire Protection Company with a commitment to provide unparalleled quality, service and support for its customers. The company, based in Norfolk, has a team of engineers located throughout the UK enabling it to provide nationwide support.

Xcell Misting Ltd design, supply, install and commission all types of fire suppression and detection systems, specialising in water mist technology; high, medium and low pressure fire suppression systems.

Xcell Misting Ltd are one of a team of only two companies authorised to supply, install, commission and service FOGTEC High Pressure Water Mist Systems in the UK and have a wealth of experience with these specific systems.

The team of highly motivated and dedicated Directors and Engineers have a wealth of experience and training within the Fire Industry, allowing them to ensure that all clients' specific requirements are individually assessed enabling the solutions provided to be tailored to each particular need.

## The Team

Office Contact 01953 856097 or 0844 8094599

### Operations Coordinator – Andy Cooke

Email: [andy@xcellmisting.com](mailto:andy@xcellmisting.com)

Andy has worked within the fire industry for 20 years, graduating from site supervisor through projects manager to company manager. His experience comprises many facets of the industry including installation, project management, service, design and sales in both hands on and supervisory roles. This provides him with a thorough insight into client's requirements and thus solutions. Andy is customer-focused and dedicated to finding the right solution for each new project and ensuring that the customer's needs are met throughout the contract.

### Technical Manager – Amanda Bradbury

Email: [amanda@xcellmisting.com](mailto:amanda@xcellmisting.com)

Amanda is an engineer with over 20 years experience, and has specialised in fire protection and suppression systems for the past 15 years. In addition to her Engineering, AutoCAD and management qualifications, Amanda is qualified and trained in all aspects of fire suppression and detection systems including, High Pressure Water Mist System Design, FHC Hydraulic Calculation Software (Water Mist Systems), Sprinkler System Design, Inergen System Design, CO2 System Design, Pyrochem System Design, R102 System Design, Vesda System Design, BFPSA Advanced Fire Alarm and Detection and Fire Risk Assessment. This experience provides her with the technical expertise necessary to be able to support the company with all aspects of technical solutions, design criteria and specifications to ensure that all clients' requirements are fulfilled utilising the most suitable solution.

### Logistics and Procurement Manager – Kevin Musk

Email: [kevin@xcellmisting.com](mailto:kevin@xcellmisting.com)

A time-served engineer, Kevin has a wealth of engineering experience, the past 15 years being within the fire industry. Kevin's focus is firmly on procuring quality equipment, to suit specific requirements and ensuring that all current standards and legislation are met or exceeded. All materials used are fully traceable and conform to relevant standards.

## **Financial Controller – Debbie Bingham**

Email: [debbie@xcellmisting.com](mailto:debbie@xcellmisting.com)

With 14 years' service as Financial Manager for a number of Fire Systems Companies including Britton Fire, Kidde Fire Protection and Fireworks Fire Protection Ltd, Debbie has a thorough understanding of the specific requirements of the financial control required for a fire systems company. The financial status of the company is safely within Debbie's hands, ensuring that the company operates successfully within the current financial climate, and continues to grow and develop in the future. Our customers therefore can have peace of mind that the support they require for existing or new projects will always be available to them.

## **Installation and Service Engineers**

Xcell Misting Ltd is fortunate to have a team of highly skilled and experienced site engineers, fully conversant with all varieties of fire systems. We offer both mechanical and electrical installation and service work and pride ourselves on the level of our competency and quality of workmanship gained through years of experience in all aspects of engineering and site work.

## **Products and Service**

We are experienced in a wide range of different applications including Food Processing, Catering, Computer and Communications Rooms, Engine Test Facilities and Generator Enclosures, Precision Engineering Workshops and Marine. Our installations range from one cylinder, one head systems protecting a chip fryer to multi thousand head, pump driven systems protecting Data Centres, Cruise Ships and Ferries.

We can design, supply, install and service the following:

- High & Low Pressure Water Mist Fire Suppression Systems
- Inert Gas Fire Suppression Systems
- Clean Agent Fire Suppression Systems
- High Sensitivity Air Aspirating Fire Detection Systems
- Coincidence Detection Systems associated with Extinguishing Systems
- Fire Alarm and Detection Systems to BS5389 and BS 6266

We carry out works for a large range of clients many of whom are ISO9001 and BS5750 approved and therefore demand very high standards. For marine applications the systems are installed to meet with the stringent SOLAS and IMO regulations.

Xcell Misting Ltd offers a call out service to its customers 24hrs a day / 365 days per year.

## **Current and Previous Contracts**

Westland Horticulture Ltd, Dungannon, Co. Tyrone

Noon Foods, Kerry Foods Ltd., Middlesex

ProtecCamerfield (Fire Division) Ltd (various contracts)

John Innes Research Centre, Norwich, Norfolk

Kings Cross Northern Lands, London

St. Thomas Hospital, London

P&O Ferries Machinery space & galley water mist servicing

Kings Security FM200 installation

UK Power Networks (EDF) water mist maintenance on transformers

BAE Combat Systems Washington, Kentec manually operated Fogtec suppression installation on two 10metre presses

3G Ericsson, Data Centres Nationwide, Fire System Servicing
